PROFESSIONAL SUMMARY

Senior .NET / Full Stack Software Engineer with 14+ years building production-grade web applications, APIs, and distributed systems, with deep expertise in C#, ASP.NET Core (.NET 6/7/8), Entity Framework, and SQL Server, complemented by full-stack experience across Vue.js, Angular, React, TypeScript, and Node.js.

Experienced modernizing legacy .NET platforms, tuning SQL Server performance, and shipping enterprise applications end to end on Azure and AWS (App Services, DevOps pipelines, CI/CD, Docker, Linux).

Leverages AI-assisted development tools (GitHub Copilot, Claude, OpenAI Codex, Cursor) to accelerate delivery and improve code quality.

TECHNICAL SKILLS

Programming Languages: C#, .NET 6/7/8, ASP.NET Core, JavaScript, TypeScript, Node.js, SQL

Frontend: Vue.js, Nuxt 3, Angular (v17+), React, TypeScript, RxJS, Angular Signals, Reactive Forms, Apollo GraphQL, SPA architecture, HTML, CSS

Backend: ASP.NET Core APIs, Entity Framework, REST APIs, GraphQL, service-oriented architecture, Node.js, Express.js, NestJS, KeystoneJS, authentication/authorization (JWT, OAuth 2.0)

Databases: SQL Server, T-SQL, stored procedures, query optimization, indexing, MongoDB, MySQL, PostgreSQL, SQLite, Prisma

Cloud & DevOps: Azure App Services, Azure DevOps Pipelines, AWS, Docker, CI/CD, Git, GitHub, Azure Repos, Linux, Apache, Nginx

Testing: xUnit, Jest, unit & integration testing

AI & Automation: GitHub Copilot, Claude, OpenAI Codex, Cursor, OpenAI API, prompt engineering, n8n, Make

Architecture & Practices: Clean Architecture, SOLID principles, Agile / Scrum, code review, pull requests, technical documentation

PROFESSIONAL EXPERIENCE

Senior Software Developer | Dominion DMS (USA) | Jan 2023 – Apr 2026

- Architected and delivered full-stack features for VUE DMS, Dominion's cloud-native Dealer Management System built on Microsoft Azure and used by franchised auto dealerships nationwide, using C#, ASP.NET Core (.NET 6/7/8), Vue.js, TypeScript, and SQL Server.
- Led modernization of legacy modules toward service-oriented architecture with dependency injection and maintainable C#/.NET API layers, reducing technical debt and cutting API response times by up to 90%.

- Successfully completed the migration of legacy client-side libraries (jqWidgets) that previous teams had been unable to deliver, extending the platform's lifespan and maintainability during its transition to a new solution.
- Optimized SQL Server performance through T-SQL tuning, stored procedures, indexing strategies, and execution plan analysis.
- Built frontend features across Vue.js, Angular, and React with TypeScript components, routing, and REST API integration.
- Managed Azure deployments (App Services, Azure DevOps pipelines, CI/CD) in Agile/Scrum teams, and applied AI tools (GitHub Copilot, Claude, OpenAI Codex) to accelerate delivery, refactoring, and documentation.

Full Stack Developer | Pangeanic (Spain) | Jan 2022 – Dec 2022 (Part-time)

- Built Node.js and Express.js automation tools and RESTful backend services that replaced repetitive manual processes, improving operational throughput and reliability.
- Designed and delivered API integrations connecting internal systems with third-party platforms for translation and NLP workflows, enabling automated data exchange and reducing manual handoffs.
- Worked with MongoDB, Angular, and reusable backend modules, focusing on maintainability and workflow automation.

Full Stack Developer | MiT Software (Spain) | Jan 2018 – Dec 2022 (Part-time)

- Developed full-stack business applications, automation platforms, and internal tools with C# and .NET (WinForms/WPF) as the core stack, alongside Node.js, Angular, MongoDB, and SQL-based systems.
- Owned the full software lifecycle — requirements, architecture, implementation, testing, deployment, and support — including bots and API integrations that cut manual tasks from up to 10 minutes to just seconds.

Senior Software Engineer | iSOFACT (Cuba) | Jan 2015 – Dec 2018

- Led cross-functional teams delivering enterprise-grade web applications using C#, .NET, JavaScript, and SQL Server across multiple projects.
- Defined multi-tenant architecture patterns and coding standards adopted team-wide; mentored developers and led code reviews, reducing production defects.

Team Lead | Wannay Geo (Spain) | Jan 2012 – Dec 2015

- Led a team of 5 developers building geo-based web platforms with mapping, location-based features, and backend services.
- Established coding standards and development workflows, and translated business requirements into technical specifications across teams.

PROJECT EXPERIENCE

ABAIntake Platform | Personal Project

- Built a KeystoneJS v6 backend with Prisma, MySQL, and GraphQL plus a Nuxt 3 frontend for an ABA therapy case-management platform, including authentication, session handling, and Apollo integration.
- Integrated OpenAI API workflows to extract structured summaries from unstructured notes and knowledge-base content.
- Deployed on Linux with Apache reverse proxy, SSL, DNS, and production-style API/frontend separation.

SeOferta Platform | Personal Project

- Built a web platform using Express.js, MongoDB, and Vue.js with API-driven frontend/backend separation and reusable business logic.
- Developed REST APIs, data models, and frontend workflows for listing and search; deployed and hosted on AWS.

Unity 3D Games & AR Applications | Personal Project | 2018 – 2020

- Built interactive 3D games and augmented-reality applications in C# with Unity 3D, integrating the Windows Kinect sensor for motion tracking and gesture-based interaction.
- Applied real-time image processing to translate body movement and gestures into in-game controls and immersive AR experiences.

EDUCATION

B.S. Computer Science – University of Informatics Sciences, Havana, Cuba (2012) — Graduated with Honors

LANGUAGES

Spanish (Native) | English (Full Professional Proficiency)
